

NOSORB®

NON-ABSORBENT CAT LITTER

NOSORB® is the original non-absorbent cat litter developed by practicing veterinarians. Using **NOSORB®** is the easy way to collect urine samples from cats for Urinalysis as a diagnostic tool. Other indications for use include monitoring hydration and kidney function and as part of a routine work-up.

Features:

- ◆ Inexpensive to use
- ◆ 98% acceptability by cats as litter
- ◆ Nonabsorbent, inert, disposable granule that makes it easy to obtain a urine sample either by the client at home or the technician in the office
- ◆ Can be dispensed for out-patient use
- ◆ Available in sealable urine cups or in bulk

Directions:

Just clean the litter pan and add **NOSORB®**. The cat will urinate as usual.

Packaging: 6-pack boxes and 5 lb. bulk
